FTS *express*™

The Ultimate Billing Appliance

No matter how much your customers grow, how many systems they will need, and what architectural changes they will have to make to accommodate future growth – they will prefer working with the same business support software.
Leap Express – an extremely flexible appliance that can be adapted to the needs of every IP operator.
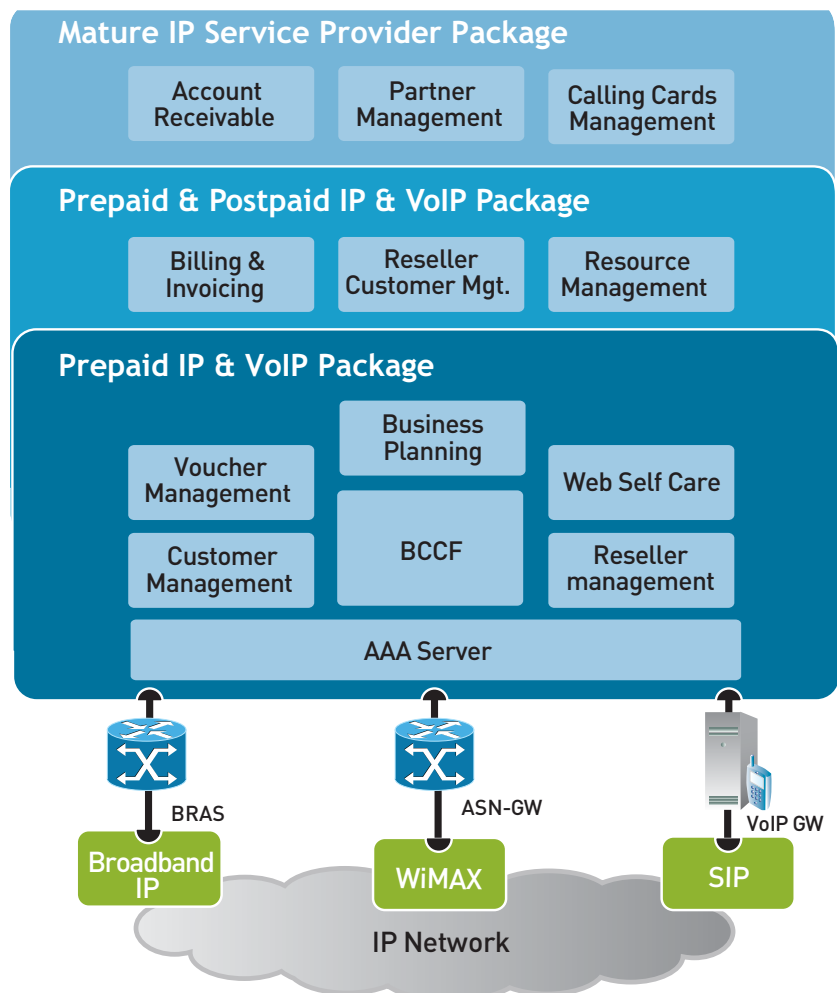

Benefits and Features

- All-in-one solution for online charging, billing, AAA, balance management, customer care, and more
- Cost effective and reliable
- 100,000 subscriber ready with basic hardware configuration
- Short deployment and implementation times
- Easily customizable to suit each operator's needs
- Predefined yet expandable business and rating rules
- Consolidated and easy to deploy package ready to grow
- Configurable - Minimal setup time for full operational mode
- Easy UI setup for localization (taxes, currency), rating, and business rules
- Expandable - Additional supporting modules and standard published APIs
- Scalable – seamless transition to full-fledged Leap™ Billing & CRM with no changes in procedures and/or interfaces

FTS Express Architecture and Functionality

FTS Express benefits from FTS' years of experience and success in billing and CRM implementations, at a fraction of the cost of full-fledged solutions.
Featuring the core components of FTS' field-proven architecture, FTS Express packs it all in a very compact plug-and-play appliance.
